SAVE TIME

The only payroll services that integrates fully with **Deltek + ComputerEase**, which removes redundancies and buys you time.

ONE TEAM

One comprehensive payroll experience — with all of your support on the same team.

What Our Customers Have to Say...

“Job costing is unique, and ComputerEase is good at it.”

– **Sam Cotton, Harmon Group of Companies**

“It’s [Deltek + ComputerEase] been very helpful... for several reasons. One is being able to track costs and track where we are on a job. If it’s starting to go south, we know that by making changes we can save the job before the point of no return.”

– **Lisa McAlister, Controller at JMC Mechanical**

“For job cost accounting software, this is the best one out there. It’s in depth, but it’s simple. Easy to set up, easy to train on. I can help people with how to use it without seeing what they are looking at, that’s how simple it is. And if you need custom reports, Qtool is great. It’s such a straight forward report writer. You don’t have to go buy all kinds of user reports anymore, which I’ve had to with other systems. I’d recommend this to any contractor and have over the years.”

– **Ed Roark, President of Bambeck & Vest**
